

SIX ARE FOUND ALIVE OF 43 MEN ENTOMBED BY MINE EXPLOSION

Rescuers Also Recover Sixteen
Bodies—Fate of Others
Not Yet Known.

ACTON, Ala., Nov. 18.—The bodies of sixteen men, killed in the explosion late yesterday in Mine No. 2 of the Alabama Fuel and Iron Company, had been recovered and six of the miners who were entombed had been rescued alive to-day.

The number of miners still missing is put at from ten to twenty. Forty-three men, the majority of them white, entered the mine early Tuesday morning for work. Whether any left before the explosion has not been ascertained.

The bodies of nine victims have been identified. At 1 o'clock this morning the rescuers, who began their relief work about 4 o'clock last night, came upon the bodies of seven miners at the sixth entry to the mine. These have not been identified.

Treat your teeth to Pebeco

Pebeco is a tooth paste that will stand by your teeth and really protect their thin, precious enamel from the attacks of "acid-mouth," the greatest single cause of decay—this is the work of an out-and-out dentifrice. This is exactly what

Pebeco Tooth Paste

does.

Nipe out of ten people have "acid-mouth," which surely leads to decay. You can stop having acid-mouth. Pebeco will do it.

But this is not all. Pebeco is healthfully refreshing and revitalizing, cleanses, whitens and polishes. Your teeth—your whole mouth feels Pebeco-clean after using Pebeco.

THE EVENING WORLD'S AND WELFARE ASSOCIATION'S
CITY-WIDE SERIES OF BETTER BABIES CONTESTS.

Their Majesties the Babies Are the Autocrats Now

Seven Improvement Con-
tests On, and Plans Per-
fected for Contests in the
Bronx and Staten Island.

With Board of Health physicians busy tabulating the score cards in the Hartley House Better Babies' Contest, the latest in the city-wide series held under the auspices of The Evening World and the Babies' Welfare Association, with seven improvement contests running in various districts of the city, and with plans being perfected for contests in the Bronx and Staten Island, Their Majesties, the babies of New York are attracting their full share of attention.

"These contests to date," said Dr. S. Josephine Baker, Director of Child Hygiene of the Department of Health, to an Evening World reporter to-day, "have been of the greatest benefit not only to the infants and parents interested, but to this department as well, and now that the winter is coming on here is a word of advice to mothers on the care of the winter baby.

HOW TO TAKE CARE OF BABY
IN WINTER.

"Be just as careful to have a doctor or nurse watch baby in the winter as in the hot weather. The milk stations are open all winter for that purpose.

Neighbors' advice is no better in cold weather than it is in hot weather. All the rules for feeding, exercise, fresh air, cleanliness and use of water that I gave earlier in the season in The Evening World should be followed all the year round.

"Of course, winter has its own peculiar dangers. You should dress the baby

Omega Oil FOR Rheumatism and Lumbago

The first thing to do, if you suffer from Rheumatism or Lumbago, is to rub the aching parts with Omega Oil; then soak a piece of flannel with the oil, lay it over the place that hurts and cover with a piece of oiled silk. This treatment usually gives relief and is worth trying. Trial bottle 10c.

warmer in winter. His clothing then should consist of a cotton dress, a cotton petticoat, light wool shirt, a light stomach band, light wool stockings and cotton flannel diapers. However, even in winter there is danger of having baby too warm. You are also likely, if you are not careful, to be afraid to let him have enough fresh air.

"In the winter the great danger to babies is pneumonia. Watch your baby carefully and if he has any sign of a cold take him to a doctor at once, especially if he has a cough. What seems to you a little cold may grow into pneumonia in a few hours, and if you have neglected it, it is likely then to be too late.

KEEP THE BABY WARM, BUT NOT HOT.

"Be sure that the room is always warm enough when you bathe your baby. Dress him warm enough but don't bundle him so he will sweat. Never leave wet clothing on him. Don't leave him in a draught. Be sure that he is warm enough when he sleeps, and yet don't have him sleep in a close room. Have your doctor show you how to fix your windows at night so that there will be plenty of fresh air in the room without having a draught blow on the baby. Take him out of doors every day.

"A good way to be sure your baby is kept covered up at night is to make his blanket into a sleeping bag. You had better ask a nurse at a milk station to show you how to make this.

"One more bit of advice for both win-

ter and summer. The best way to know whether your baby is well is to see if he is gaining in weight every week. You should weigh him regularly and keep a weekly record of his weight. They will do that for you at the milk station. After all, the best advice I can give you at any time is to take your baby to the milk station, where they can study your particular baby and tell you better than I can how to take care of it."

Remove Dandruff

Dandruff is not a necessary evil. Modern science has produced from the purest grade of an chlorine and sulfur called CRUDOL.

CRUDOL retains all the good qualities of crude oil, eliminating all the disagreeable odors. It does not make the hair oily, and, therefore, the hair does not have to be washed after its use. Leave it on; it penetrates right down to the roots of the hair.

CRUDOL will destroy dandruff, stop itching hair, promote its growth, stimulate the roots, prevent itching scalp and make fine, lustrant hair. It combats eczema, seborrhea, feed the hair roots with CRUDOL, don't dry them with alcohol. It will not change the color of the hair. Just try.

CRUDOL

is PURELY sold by drug and department stores everywhere at 25 and 50 cents a tube. CRUDOL ANTISEPTIC SHAMPOO, a similar but more powerful cleanser. Large tube, 25c. CRUDOL Products Corporation, 177 Broadway, New York.
